## ANOTHER WONDER OF SCIENCE

Biology Has Proved That Dandruff is Caused by a Germ.

Science is doing wonders these days in medicine, as well as in mechanics. Since Adam lived the human race has been troubled with dandruff, for which no hair preparation has heretofore proved a successful cure until Newcomb's Herpicide was put on the market. It is a scientific preparation that kills the germ which causes dandruff or scurf by digging into the scalp to get at the root of the hair, where it saps the vitality, causing itching scalp, falling hair, and finally baldness. Without dandruff hair must grow luxuriantly. It is the only destroyer of dandruff sold by leading druggists. Send 10c in stamps for sample to the Herpicide Co., Detroit, Mich.

WAXES ABOUT SEEING WAX. A work on heraldry, by Paul Gruenel, recently published at Leipzig, contains some information on the subject of sealing wax and the rules governing its use in the days of old.

White wax was for the kings of France, and later for the kings of Sicily. A few dukes were allowed the high privilege, through the generosity of Frederick III. Red wax was for the pope and the German monarchs, but, as a mark of favor to the people, it was allowed to be used generally. Green wax was for the common people, and some cities which had been faithful to their government were compelled over afterward, as a mark of their shame, to seal all public documents with green wax.
